

FOR INFOR LX USERS

End-to-End Parcel, LTL, & Freight Shipping Execution with Varsity

See how the only holistic shipping solution built for the IBM i helps Infor LX users simplify fulfillment, shipping, compliance, and shipment management across parcel, LTL, and freight from a single integrated platform.

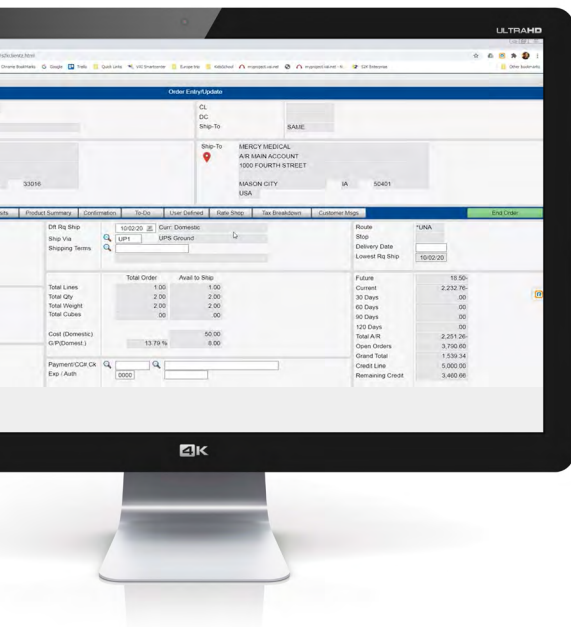

Organizations rely on Infor LX, formerly known as BPCS, to manage inventory, production, warehousing, and order fulfillment across complex operations. But as shipping volumes grow, many organizations find that carrier compliance requirements, manual shipping processes, and disconnected systems can create bottlenecks at the dock, increase errors, and limit visibility into shipment activity and transportation costs.

For over 35 years, Varsity Logistics has helped manufacturers, distributors, retailers, and healthcare organizations automate parcel, LTL, and freight shipping on IBM i. Because both Infor LX and Varsity run natively on the IBM i platform, LX users benefit from a pre-built integration that extends existing order fulfillment workflows, giving customers a way to operate more efficiently without disrupting established processes.

BUY ONLY WHAT YOU NEED

Varsity is modular by design and tailored to how you actually ship. Start with the capability your operation needs today — parcel, freight, packing, auditing — and add modules as your requirements change. You are never paying for a bundle you do not use, and nothing has to be re-implemented to grow into it.

Varsity and Infor LX at a glance

ORDER RELEASE

Automatically populate orders released from Infor LX into Varsity shipping workflows, enabling rate shopping across parcel, LTL, and truckload carriers based on pre-defined business rules.

PACKING & VERIFICATION

Verify packed contents against pick ticket and order information before shipment, helping improve accuracy while automatically generating labels, packing lists, and shipping documents.

SHIP CONFIRMATION

Confirm shipments from a single screen while generating carrier labels, bills of lading, export documents, and manifest records, with freight costs captured in real time.

SHIPMENT VISIBILITY

Capture tracking numbers, package details, shipment weights, delivery status, and freight charges throughout the shipping lifecycle.

AUTOMATED WRITE-BACK

Return tracking numbers, package details, weights, and shipment charges directly to Infor LX, ensuring complete order visibility and accurate shipping records.

Key Benefits of Varsity Integration

IMPROVE SHIPMENT ACCURACY

Validate packed contents against Infor LX order and pick ticket information before shipments leave the dock.

SIMPLIFY CUSTOMER COMPLIANCE

Automatically generate customer-specific labels, packing lists, ASNs, export documents, and routing guide requirements.

KEEP SHIPPING MOVING

Complete shipping processes independently of ERP batch schedules and automatically return results back into LX.

OPTIMIZE TRANSPORTATION COSTS

Compare parcel, LTL, and truckload options on a single screen and automatically select carriers based on cost, service levels, or pre-defined business rules.

GAIN GREATER VISIBILITY

Capture tracking information, package details, shipment weights, and freight charges throughout the shipping process.

NATIVE IBM I INTEGRATION

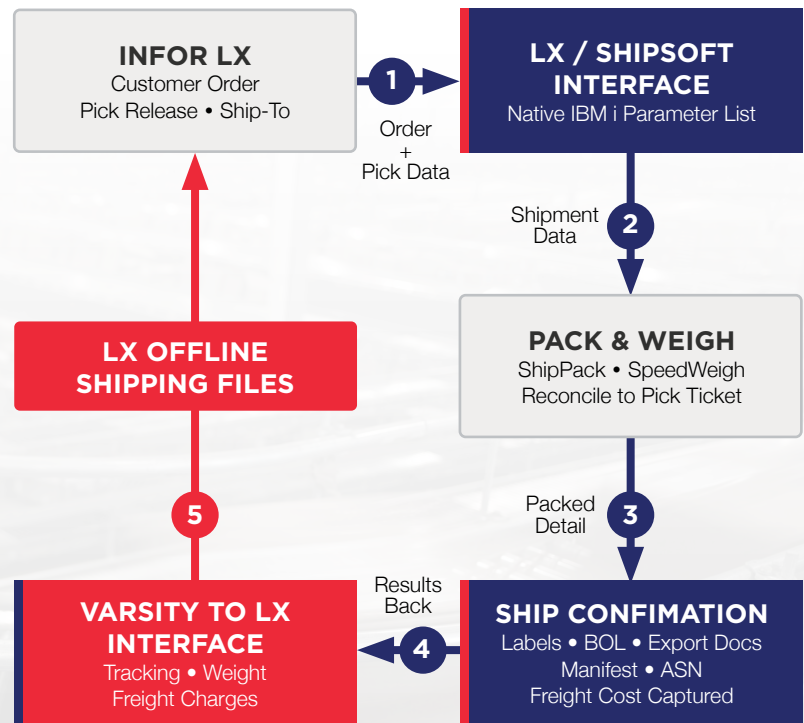

Operate within the environment your users already know while preserving existing LX workflows.

STRENGTHEN FREIGHT MANAGEMENT

Audit carrier invoices, validate transportation charges, and identify billing discrepancies before they impact costs.

SCALE AS REQUIREMENTS EVOLVE

Add freight planning, auditing, visibility, and advanced shipping capabilities as operational needs grow.

Varsity reads order and pick data from LX, controls packing and ship confirmation, then returns the shipment results to Infor LX automatically.

How Varsity Integrates with Infor LX

Through native IBM i connectivity, Varsity works alongside Infor LX to create a connected fulfillment and shipping process from order release through delivery. Order information flows from Infor LX into Varsity, where users can pack, validate, rate shop, ship, and generate required carrier documentation. Once shipments are confirmed, tracking information, package details, carrier data, weights, and freight charges are automatically returned to Infor LX.

Varsity Products with LX Interfaces

- ShipSoft™ Parcel
- ShipSoft™ Freight
- ShipPack
- ShipSelect
- ShipAudit
- ShipView
- FreightPlan

*License only what you need.
Add more as you grow.*

Take Control of Shipping Within Your Infor LX Environment

Looking to eliminate shipping bottlenecks, improve fulfillment accuracy, and simplify transportation management without disrupting current workflows? Contact Varsity Logistics to learn how a seamless integration with Infor LX can help keep shipping operations moving efficiently from the warehouse floor to final delivery.
