

FOR INFOR XA USERS

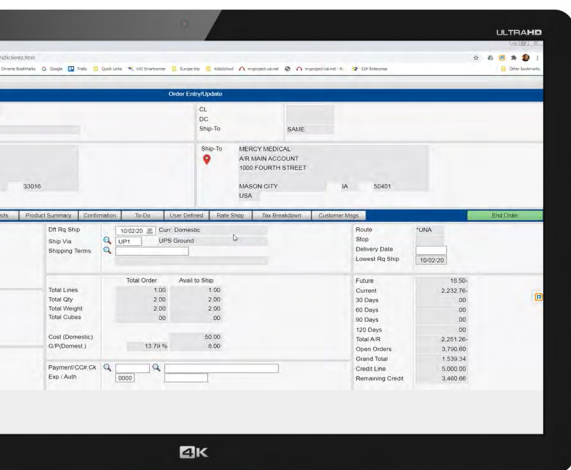

Integrated Parcel, LTL, & Freight Shipping Execution with Varsity

See how the only holistic shipping solution built for the IBM i helps Infor XA customers streamline packing, shipping, and compliance while maintaining complete control over parcel, LTL, and freight execution.

Organizations rely on Infor XA to manage production, inventory, and order fulfillment, but shipping often requires separate systems, manual data entry, and disconnected workflows. As shipment volume increases, these gaps create inefficiencies, compliance risks, and limited visibility into transportation costs.

For over 35 years, Varsity Logistics has helped IBM i organizations simplify and automate shipping operations across manufacturing, distribution, retail, and healthcare industries. Now, companies using Infor XA can benefit from a seamless, pre-built connection with Varsity that runs natively on IBM i, giving customers an integrated shipping environment that works directly alongside existing XA processes.

Varsity and Infor XA at a glance

ORDER RELEASE

Automatically populate orders released from Infor XA into Varsity shipping workflows, enabling shipment planning and carrier selection based on pre-defined business rules.

PACKING & VERIFICATION

Verify packed contents against order and pick information before labels are produced, helping eliminate shipping errors.

SHIPPING EXECUTION

Generate carrier-compliant labels, bills of lading, export documents, and manifests from a single shipping process.

SHIPMENT VISIBILITY

Capture shipment status, tracking data, package details, weights, and freight costs in real time.

AUTOMATED WRITE-BACK

Return shipment information directly to Infor XA, ensuring complete order visibility and accurate reporting.

Key Benefits of Varsity Integration

ELIMINATE SHIPPING ERRORS

Validate shipment contents against XA order information before the shipment leaves the dock.

IMPROVE CUSTOMER COMPLIANCE

Automatically generate customer-specific labels, packing documents, routing-guide requirements, and ASNs.

KEEP SHIPPING MOVING

Complete shipping processes independently of ERP batch schedules and write results back into XA.

OPTIMIZE TRANSPORTATION COSTS

Compare parcel, LTL, and truckload options on a single screen and automatically select the best carrier based on defined rules.

GAIN FREIGHT COST VISIBILITY

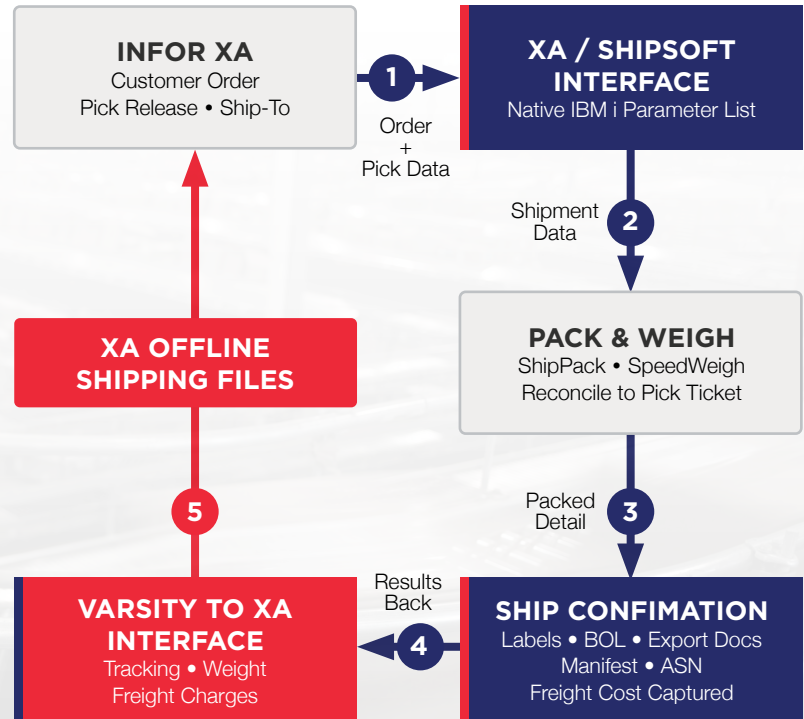

Capture actual transportation costs and improve reporting accuracy inside XA.

NATIVE IBM I INTEGRATION

Operate within the environment your users already know while preserving existing XA workflows.

SCALE WITH BUSINESS GROWTH

Add shipping, freight, auditing, and planning functionality as operational requirements expand.

How Varsity Integrates with Infor XA

Through native IBM i connectivity, Varsity receives order and shipment data from Infor XA, manages the packing and shipping process, then returns tracking, package, weight, and freight information back to XA upon shipment confirmation.

Varsity Products with XA Interfaces

- ShipSoft™ Parcel
- ShipSoft™ Freight
- ShipPack
- ShipSelect
- ShipAudit
- ShipView
- FreightPlan

*License only what you need.
Add more as you grow.*

Take Control of Shipping Within Your Infor XA Environment

Looking to reduce manual processes, improve shipping accuracy, optimize transportation costs, and increase visibility across parcel and freight operations? Contact Varsity Logistics to learn how the Infor XA integration can help streamline your shipping operation without disrupting existing workflows.
